TRAINERS AND JOCKEYS LICENSED.

The meeting of the Board of Control yesterday was a otracted one, beginning at 3:30 o'clock and lasting with 7 o'clock. Most of the time was taken up with the entries to the stakes at the different tracks. The entries to the great handleaps will be given to the press to-day. It is said that "Ed" Corrigan's entries will be ignored by the Board of Control tracks, as they have decided to stand by the action of the Coney Island Jockey Club. P. McDermott's license will not be issued. The next meeting of the Board will be on next Tuesday.

The following were beensed: Trainers-George W Newton, William Lakeland, Frank McCabe, W. P. Berch, Matthew Fenkes, William H. McCarthy, W. B. Jennings, Walter Rollins, K. K. Allrock, C. F. Vandewater, Green B. Morris, L. W. Street, W. J. Spier, F. T. Miller, Henry Hards, John B. Elliott, Peter Weber, R. W. Walden, Jeter Walden, Charles Littlefield, Charles Littlefield, jr., and Charles Boyle. Jockeys-George Evans, William Burko, Anthony Hamilton, Joseph Connelly, John Abrams, W. Sweeney, W. Har-rison, Edward Mosher, George Earbee, Reginald Harris, George W. Withers, John Weber, Charles Weber, Andrew Dorsey and C. Walker.

TALK ABOUT A NEW RACETRACK.

The rumors in regard to increasing the number of months in which racing is legitimate have caused a great deal of talk in the uptown resorts of torsemen. It was reported that the Brooklyn Jockey Club was at the bottom of the affair, and that it was one of the plans by which the Board of Control would break up the Hudson County Racing Association. At the American Institute yesterday the plan of a new racetrack to be built, suitable for either trotting or running con tests, was exhibited, and the diagram was explained, showing how either a kite or regular-shaped track could be trotted over, while there would be a running track with a three quarter-mile chute over ground which is level. It could be in shape to race over next fall. The site is the one talked about some months ago, and is on the New-Haven Railroad near Casanova, within a mile and a half of the Harlem

Many of the projectors are said to be wealthy and in the foremost ranks of the trotting and running turf, who are having the bill presented to amend the Ives Pool bill. That such a track would be a success goes without isaying, as it would furnish a convenient track and drive for the owners of trotters, with every opportunity to try their horses' speep. The projectors talk of having athletic contests and securing the col-lege football games, and, in fact, of covering every-thing which pertains to outdoor sports.

FOR THE YALE ALUMNI DINNER. The indications are that the annual dinner of the Yale Alumni Association, at Delmonico's, on Friday svenipr, will be largely attended. Last year there were poo members present, and over 100 had secured tickets yes erday afternoon. On the last day there is always a large number of names sent in, so probably there will be nearly 300 in attendance this year.

FOR A CLOSE ELECTION CONTEST.

WHO WILL BE NEXT PRESIDENT OF THE BOARD

OF EDUCATION ? The contest over the presidency of the Board of Education will be decided at the meeting this afternoon Both J. L. N. Hunt and Adolph L. Sanger, the principal candidates for the place, were busy mustering their forces yesterday. Each is still hopeful of securing the place, although neither seemed so positive yesterday as heretofore. Unless Mayor Grant fills be-day the vacancy caused by the resignation of Congressman Little there can be only twenty commissioners on hand at the meeting to vote. Eleven votes therefore will be necessary for a choice. There is a possibility, in deed, that there will be only nineteen commissioner present, as Commissioner Purdy has not been at all well lately and has been obliged to remain at home in bad weather. His absence might prove serious to President Hunt, as it is understood that Mr. Purdy is in favor of his re-election.

President Hunt's friends, however, are still confident

that he will carry off the prize. The admirers of Com-missioner Sanger, who is popular both in the Board and

prospects of to-day's election. If the commissioner are unable to elect either Mr. Hunt or Mr. Sanger the will doubtless cast their votes for Commissioner Lummis Several commissioners, including Commissioners Morgarty and Hopper, have declared that they will cast complimentary votes for Mr. Lummis in the first ballo Those complimentary votes, if east, may decide the election, however, and efforts will be made to keep the ommissioners from making them.

In speaking of the election yesterday President Hunsaid that the contest had been friendly throughout and that there would be no hard feelings whatever way the election might end. It is expected that the room of the found of Education will be crowded this afternoon with teachers, trustees and other officers of the school system, who are all interested in the outcome of the contest.

LIQUOR DEALERS APPROVE THEIR BILL

THE NEW EXCISE BILL TO BE SENT TO ALBANY -OFFICERS ELECTED.

Several important subjects came up for discussi-Dealers' Central Association at No. 52 Union Square yesterday. The most important business that brought before the meeting was the new Excise bill several amendments have been made to the document during the last few days, and it was presented to the meeting by the excise committee for approva of the liquor dealers. After the secretary had rad the bill as amended one or two little changes wer suggested and then it was approved by a unanimous vote. A committee was appointed to take the interesting document to Albany to day, and after Mr. Hersberg, of Albany, the attorney of the association has examined it to see that it is in proper legal form it will be presented to the Legislature.

The new Excise bill, if it becomes a law, will permit rumsellers to keep their places open on Sundays. It will also permit barrooms to remain ope all night under certain conditions. When some big entertalament is in progress adjoining a barroom, the liquor dealers say, the place ought to be permitted to remain open all night, or after hours, for the accommodation of the gaests. The bill also provides for this, and for the selling of liquor at balls and entertainments at any hour after 1 a. m.

The members of the association feel confident that the bill will be passed by the Democratic Legislature. When they were refreshing themselves in the bar room beneath the hall where the meeting was held, after the gathering had adjourned, three or four of the liquor dealers said that they were certain that the bill would be passed.

"The Democrats have always been our friends," said one of the men, "and as we have always been loyal to them they cannot desert us this time. They will hardly dare to defeat the bill. If the Democratic legislators do not grant us favors they will not remain in power long."

When the election of officers came up at the meeting there was no indication that there had been a contest it was said outside that several fiquor men desired to be the president, but this was not manifested at the meeting. A nominating committee was appointed and when the sinte was presented to the memors it was approved without a dissenting voice. Following are the officers as elected: Morris Tekulsky, pre-dent; Frank G. Rhin, first vice president; Frank flack as approved without a discatting voice. Protowing re the officers as elected: Morris Tekulsky, pre-ent; Frank G. Rhan, first vice-president; Frank Hack-lan, second vice-president; Heary Kellty, recording ceretary; Daniel McLaughlin, Branchai secretary; . W. Prelle, treasurer, and Michael Ledwith, sergeant-

TO PUT THE MONITOR IN FULL IRIM.

The double-turreted monitor Miantonomoh lay moored at the builthead in the Navy Yard yesterday as quietly and peacefully as if she were not intended for one of the most formidable war weapons that was ever designed in mind or in form. In form she l not so suggestive of defiance as are some of the land steel cruisers, each with its ram, the solid mass e steel projecting from its bow, but it is ten to on that she would prove herself an effective defende aminst anything affoat in any navy. Her deck i only about two feet above the water-line, consequently very little else than the two turrets, the conning-tower the smokestack and a small portable superstructure show above the water. The turrets are circular fortresses or martello-towers, so shaped as to throw off a projectile striking them. Having had a satisfactory test of the 10-inch and other guns, and the hydraulic machinery for working them, a full de scription of which was published in The Tribut a, No vember 29, 1891, she is now to be put in 'ill trim for active service. The hydraulic machinery will be overhauled and readjusted, the electric steering gear will be completed and connected, and a few repairs minor importance will be made.

There was some talk among the officers of the vessel yesterday that if the Chillan controversy was not soon settled the Miantonomoh would probably be sent to Chilian waters, but the source of the rumo could not be traced to anything official from Washing ton. If she should go she would probably steam all of the way, with the cruiser Newark as an escort. The latter is now at Norfolk having some fittings added which would enable her to do towing of Ironclads in case it should be necessary. The Mianto-nomoh is perfectly seaworthy, and could probably go the entire distance to Chili without any assistance from any other vescel, but her movements will de-pend largely upon the Chilian buttle-ship Captain Prat, which has not yet left France.

RESIGNATION OF THE REV. DR. BATTERSON. A report published yesterday that the Rev. Dr. H. G. Eatterson had resigned from the rector hip of the Protestant Episcopal Church of the Redeemer at tracted a good deal of attention in religious circles A reporter who called at the home of the Rev. D: Eatterson yesterday afternoon was told that Dr. Rat-terson was out of town, but that he would return Wednesday. The Rev. Frederick W. Davis, the as sistant rector, who was seen in his study at the rear of the church, said: "Upon the resignation of the Rev. Dr. J. W. Shackelford, the former rector of the church, which took place about a month ago. hatterson accepted the charge and came here from Philadelphia for that purpose. Our church is heavily in debt, and it was thought that Dr. Batterson, being a man of means and one who had been successful in carrying on the affairs of churches situated like ours, would make a most efficient rector. He came ours, would make a most elected recor. He came here in poor health, however, and although all possible efforts were made to lighten his labors, he yielded to the advice of his physician and withdrew his letter of acceptance a few days ago. I have been appointed by the vestry to conduct the services for the present. Our congregation is large, and I think that the work of the church will move along smoothly. Dr. Batterson is more than sixty years old."

OLIVER HITCHCOCK'S WILL

The will of Oliver Hitchcock, the restaurant keeper the was so well known by New-York newspaper men was filed for probate in the Surrogate's Court yester The business is left to the son, Oliver N., and the wife receives the income of the entire estate for life, and at her death the estate is to be divided into four equal shares. One share goes to Oliver N., one to Edward A., another son, one to the daughter Adelaide Adela Hall, and one to a granddaughter, Louisa A. Hitchcock. The will was executed on December 13, 1888, and the executors are the son Oliver, the widow and the son-in-law, Charles E. Hall.

APPLYING FOR AN INJUNCTION. R. L. CUTTING AND J. T. BURDEN COMPLAIN OF CONSPIRACY.

Robert L. Cutting and J. Townsend Burden applied to Justice Parrett in the Supreme Court, Chambers, yesterday, for an injunction restmining the Inter-national Boiler Company and the Stirling Company om disposing of 2,700 shares of stock of the Stirling Company and the sum of \$67,500, which the Holler Company received for the 2,700 shares of stock. Cutting and Townsend declare that there was a conspiracy to cheat them as stockholders and directors of be Boller Company. The Boller Company owned a umber of patents under Allen Stirling. There was an greement made by which the Stirling Company was have the good will and patent rights of the Roller ompany, and the consideration was to be 2,700 shares of the Stirling Company and \$10,000 each give to the Botler Company. This agreement was made just before the Stirling Company was formed in August, 1890. The agreement was carried out and the tofler Company held the 2,700 shares of stock, nominally worth \$270,000.

Cutting declares that the Board of Directors, at a meeting, decided to sell this stock at a price not less than \$200 a share, or double its par value.

Another meeting was held and it was decided to sell

the stock at not less than \$100 a share. Still later it this resolution was carri d out. When this last meeting was called Cutting declares that he saw James A. Dennison and Stirling and they told him that only routine business was to be transacted. Upon that surance he did not attend the meeting. The resoluassumance as did not attend the meeting, as share was passed at this meeting, and the stock was sold to sirring for sef, also, tutting says this was a conspiracy, and he wants stirring restrained from disposing of the stock, or the Bodev Company from disposing of the mency. He wants the bonds sold at auction and the proceeds divised among the bondholders.

Decision was reserved on this motion for an injunction.

AN IMPORTANT CUSTOMS CASE.

Judge Wheeler in the United States Circuit Court resterday heard argument in an important customs E. S. Higgins, of this city, imported a lot of wool in April, 1801. Part of it was white Candahar, eparated according to color and quality. On this the ollector assessed a duty of 100 per cent ad valorem Unsorted | Bridges and Turnels-Murphy, Brown, Dooling, Talt and Cowle. the wool being worth more than 13 cents a pound, and being sorted according to color and quality. wool of the same value would pay only 50 per cent. Part of the wool was gray and part yellow, being oried as to color, but not as to quality. worth less than 13 cents a pound, and duty was first | Tale assessed at 64 per cent ad valorem, it being held that the wool had been sorted. I'nsort i wool of the same

grade would be dutiable at 32 per cent.
The Loard of Appraisers reversed the Collector's decision, placing the duty at 50 and 32 per cent. The Collector appealed the case to the Chemit Court. Asdistant District-Attorney Thomas Greenwood appeared for the Government, and Curie, Smith & Mackle for the importer. Mr. Smith argued that the cheaper grade was not sorted, and was therefore not subject to the double duty. He further reasoned that the duty levied on the finer grade was illegal, as it amounted to more than three times the duty on the same kind of unwashed wool. The decision will be handed down in a day or two.

BEHEADED BY A LOCOMOTIVE'S WHEFILS.

A stranger, whose appearance indicated that he was road track a short distance north of the Meirose station of the Harlem Railroad yesterday morning. He threw himself on the ground in front of a train, and his head was cut off by the wheels of the focomotive. Train treasurer, D. W. Craig. No. 23, of the New York, New Haven and Harrford Railroad, which left Portchester at 8 a. m., was going ONE OF THE 10 south at the rate of forty miles an hour. It was drawn by locomotive No. 205, in charge of Engineer W. S. Mornhinweg. When It was about 200 feet north of the bristic which spans the tracks at One-hundred and sixty fifth-st., at \$140 a. m., the engineer saw a man walk quickly from one of the abutments of the bridge and stand on the track over which the train must pass It was evident later that the man had been hiding behind the abutment on the watch for a train which did not step at the Melrose station and therefore would be going at a high rate of speed. At sight of the man Mornhinweg blew the whistle as a warning, although the man was looking straight at the train. The next moment, when the becomedive was about 150 feet away from him, the man threw off his hat and dropped on the ground beside the track. Lying on his stomach he deliberately placed his neck on the easterly rail and pressed his face down upon the gravel between two ties, in such fashion that his head could not be struck by the cowcalcher. Mornhinweg instantly applied the brakes, but he could not check the speed of the heavy train in time to prevent the man from carrying out his train in time to prevent the man from carrying out his plan of suicide. As the train slowed up the locomotive swept over the man's head, and the wheels severed his neck as peatly as a meat-axe could have done the work. Apparently the man was thirty-five years old, with light complexion, brown bule and mustache. His clothing consisted of a gray striped coat, black cardigan jacket, striped calico shirt, white underwear, blue and gray striped trousers, brown stockings, new shoes of fine condity and a black derby hat. striped calico shirt, white ut striped trousers, brown stock quality and a black derby hat

NEEDS OF THE SOCIETY FOR THE PREVENTION OF CRUELTY TO CHILDREN.

At a largely attended meeting of the Board of Directors of the New-York Society for the Prevention of Cruelty to Children yesterday, at 4 p. m., in the One man testified against Langeheine cooms of the society, No. 100 East Twenty-third-st., it was decided to build without delay a new fireproof building for the society. Mr. Gerry called attention to the fact that the society was much in need of a streproof building for the purpose of preserving its records of over 500,000 families. These records, if burned, would not only interfere with the work of the society, but in many cases children might lose their inheritances through inability to prove their parentage.

The following were appointed a building committee The monotony of the Board of Aldermen's proceedwith powers to secure suitable plans and to find a ngs was infringed upon yesterday by a spley contention over an attempt of the Committee on Rules to re emporary building for the society after May 1: James A. FASCINATION.

Why so Many Ladies Who Should be Attractive Fail to Please-A Brilliant Woman Reveals the Secret.

[Ladies' Home.]

"Dress is everything."
"Is it? Some beautiful women cannot be improved
by a dress, no master how artistic it may be made."
The speakers were two lady reporters for society
papers. They had attended balls, receptions and parties

for years. They had studied the effects of costumes, the lines of beauty, and had faithfully written upon them in the papers they represented. They were masters in their art, and yet they differed. "You cannot prove your assertion by any lady of high standing and authority."

"I can," replied her companion. "Within two days

I will show you an interview with the leading woman of dress of America." And the two friends parted. Areas of America." And the two fremes parted.

Last Wednesday they met at the same place, when, producing a neatly written manuscript, the lady read the following remarkable interview:

"Mrs. Annie Jenness Miller is the acknowledged au-

thority in America upon the subject of dress. An at-tractive woman herself, she knows how to render other women attractive in the highest degree. I sought an interview; it was granted, and I give you the results:
"'Do you think, Mrs. Miller, that women are made more attractive by their dress! 'That depends upon what you mean by attractive.'

" Pleasing, fascinating, if you choose-more to men and other women.' "'A simply beautiful woman is seldom attractivo;

stupid one never. It is the soul, the life, the brilliancy, which render women attractive."

"Pil admit that, but what makes women brilliant?"

"Vivacity, brightness and good health. Did you ever see a sickly woman able to entertain a dinner party of bright people. On the other hand, did you ever know a cultivated and refined woman, overflowing with animal life and spirits, who was not fascinating !

" 'So, you believe perfect health is the secret of fascingtion, do you?' "Most certainly. Artistic dressing is proper, fine

curves attractive, but life such as comes from healthy throbbing blood is alone fascinating. It is a great misbake, however, to think that health is preserved by dress alone. Women must have proper food, freedom from care and a good friend in need. What do you mean by that?'

"'What do you mean by that?"

"Some assistance, physically. All women feel depressed at times, and all pleasure seems gone out of life. On all such occasions, and indeed whenever blue or worn out, she needs help. I know, because I have been in that condition myseif."

"And what do you do when in that condition?"

"There thing, and one thing only. I am assisted by "'And what do you do when in that condition?"

"'One thing, and one thing only. I am assisted by the best friend that any woman ever had. It is Warner's Safe Cure. I mean it, and I have good reason to speak as I do. You think I am a perfectly healthy woman; so I am, but I take saveral bottles of this great cure every season, just as I take additional care in the selection of tonic-giving food. As you know, there are certain times when every woman needs assistance. At such times, and before such times, there is, so far as I know, but one thing that can help, and that is the great cure I have named."

"I hade Mrs. Miller a reluctant goodby, for I felt that I had not a woman who knew women, what their trials and troubles were, and what they required."

WORKING FOR HARMONY.

EFFORTS TO UNITE THE LOCAL CONGREGATIONAL CONFERENCES.

Efforts to heal the schism that separates the Manhattan Conference of Congregational Churches and the New-York and Brooklyn Association of Congregational Churches, were renewed yesterday. At the annual meeting of the latter body held in Central Church, No. 300 West Fifty-seventh-st., a motion was passed authorizing the appointment of a committee of ten to consult with a similar body from the Manhattan Conference, with a view to bringing about a recon-

ciliation between the two organizations.

The motion to appoint a committee met with some opposition. The Rev. William Lloyd maintained that it would be beneath the dignity of the New-York and Brooklyn Association to make any advances. The Rev. Dr. Whiton said that both factions had agreed that a union ought to be made, but he thought that the association had no authority to take the necessary step without consulting the various congregations. H. R. Waite said that the division arose from mean motives and was kept up through human meanness. He was
